REGULATORY FRAMEWORK & ULPIN ASSIGNMENT PROTOCOLS (NAKSHA STANDARD 2026):

- DGPS RTK & Height Precision: All ground control observations must achieve RMS accuracy <= 10mm horizontally and <= 20mm vertically.
- Dual Height Tagging: Both Absolute Ground Elevation (m MSL) and Structural Superstructure Height (m above ground) are mandatorily recorded.
- Standard 14-Digit ULPIN & Temporary ULPIN (TEMP270410XXXX): All building ULPIN IDs strictly adhere to the 14-digit standard. Temporary ULPINs are assigned when field boundaries are contested, subdivision is underway, or high-rise vertical rights
- Conversion to Permanent ULPIN: Occurs upon joint verification by PMRDA Town Planning Officer and Surveyor signature endorsement.
